

# **Intertype Matrix Catalog**

Including all font numbers, part numbers, point sizes,  
font descriptions, casting positions and status levels.

**DRAFT – ALPHABETICAL**  
**published by Brian P. Lawler**  
**for The Blognoscicator**  
**July 7, 2024**

## Notes on this edition of the Intertype Matrix Catalog:

### ALPHABETICAL

This catalog was reproduced from the 19XX edition of Intertype's matrix offerings. This edition is presented in the same order as the original book, with the Font Number being the sorting standard.

It was created from scans made of the original booklet made by my friend Bill Berkuta. Those were edited in Adobe Photoshop, then fed into ChatGPT, whose artificial intelligence was able to convert the images of the original text into editable text, keeping the original columns intact. No other method of conversion worked on this text.

I have made no effort to proofread the booklet, but will do so when I am able.

This was originally published by The Blognoscicator (blognoscicator.com) as a public service to the many (several?) people alive who might want to look up an Intertype matrix number, or check to see if Intertype made a specific typeface.

I have already published a similar booklet for the Linotype library. That is also available on The Blognoscicator.

Brian P. Lawler  
San Luis Obispo, California

July, 2024

The letter **C** in the Status column means Cap Font; **F** means that the font is a Figure Font. Double asterisks in the Part Number column mean that the font has only a-z lower case. A single asterisk indicates that you should refer to the Intertype price list (good luck!). **Complete** means that the font has all normal characters. A single dagger † means Caps, Small Caps, Figures and Points; a double-dagger ‡ means A-Z caps only.
